

The sixth annual NGBT international meeting will feature exciting developments in genomics technologies, and their applications in life sciences including human, plant and animal biology, drug discovery, cancer immunology, genome engineering using CRISPR/CAS9, clinical trials, and personalized therapy. Accomplished national and international speakers who are thinkers and thought leaders who shape the course of scientific discovery will speak at the meeting. The conference will be an ecosystem for scientists and students to share their work, build new connections and explore collaborations. Ernst & Young LLP will lead an "idea exchange" forum where national and international institutions and individuals will be able to pitch their intellectual property (IP) or ideas to investors and entrepreneurs.

Meeting scholarships and travel awards for students (150) to cover their attendance at the meeting is available.

Genomics Project grants to support research in areas of human disease, plant sciences and wild life conservation has been announced by SGRF. Successful applicants will be announced at the NGBT meeting.

SGRF Excellence in Science Awards will be presented at the NGBT meeting. It will honor scientists who have made fundamental and pioneering contributions to basic and/or translational research.
